OVERVIEW

Evidence that holds up — in incident response and in court.

Our team has worked high-profile civil and criminal matters and incident response investigations, including analysis of advanced malware engineered by state-sponsored attackers.

Our analysts hold the GIAC certification in digital forensics and malware analysis, and our lab tailors each investigation to your requirements.

SCOPE

Digital Forensics

Civil and criminal proceedings

Incident response

Advanced malware analysis

Ransomware and extortion

Data-breach litigation

Online money laundering

APPROACH

How we work

01

Scope

Rules of engagement, allowed targets and knowledge levels agreed in writing.

02

Reconnaissance

We map your attack surface exactly as an outsider would see it.

03

Execution

The same tactics and techniques as a real attacker: digital, physical and human.

04

Evidence

Every finding with proof, business impact and a prioritized fix.

05

Debrief

We walk technical and executive teams through what we found and what to fix first.

WHAT YOU RECEIVE

Evidence that holds up in civil and criminal proceedings — even against state-grade malware.

-
- 01 Expert forensic report
 - 02 Evidence with chain of custody
 - 03 Threat actor profile and timeline
 - 04 Legal support and court testimony
-

WHY M360iSEC

A specialist practice, not a report factory.

We think like the adversary

We use the same tools, tactics and techniques as a real attacker to find what is actually exposed.

From finding to courtroom

If prevention fails, the same team investigates, preserves evidence and supports the legal process.

Certified specialists

Professionals holding 75 certifications, including GIAC in digital forensics and malware analysis.

Regional experience

Based in Bogotá, serving clients in 9 countries for over a decade.
